Pablo González Rodriguez

Software Developer

Email: pablopeiboll@gmail.com
Address: Calle Frei Rosendo Salvado numero 29 6E, Santiago de Compostela, Spain
Phone: +34634614612

OBJECTIVE

Passionate fullstack developer with more than 6 years creating products and improving code skills.Friendly and open to work with other people around the world.

EXPERIENCE

Spain
Aug 2023 - Present

React Native Developer
Riu Hotels

Developed and maintained cross-platform mobile applications using React Native.
Implemented features, optimized code, and ensured consistent performance on iOS and Android.
Collaborated with design teams to create responsive and visually appealing user interfaces.
Integrated APIs and third-party libraries to enhance application functionality.
Conducted thorough testing, identified bugs, and implemented debugging solutions.
Stayed updated on industry trends, adapting development processes for continuous improvement.

Spain
Apr 2023 - Aug 2023

React Developer (Tods)
Orienteed

Apr 2023 - till React+ Developer (Tods) , Orienteed A Coruña I have extensively worked on adapting this application to cater to users with special accessibility needs. In order to comply with ADA standards , a comprehensive restructuring of the entire application was required. This involved modifying and updating all the necessary components to ensure adherence to the standard.

Spain
May 2023 - Aug 2023

React + HCL(Java)
Orienteed

to manage state management efficiently , this application utilizes Redux along with a reducer to handle different states effectively. Additionally , I implemented Redux Saga as middleware to facilitate complex asynchronous operations and enhance the overall functionality of the application. By implementing these changes and adhering to ADA standards , the application is now more inclusive and accessible to a wider range of users. The restructuring process and integration of Redux with Saga have resulted in a robust and user-friendly application , prioritizing accessibility and compliance with industry standards. May 2023 - till React+ HCL (Java) , Orieented A Coruña I am currently working on a project for Dhal , a Finnish company specializing in e-commerce. My role involves assisting with various tasks related to continuous integration and continuous deployment CI/CD , as well as resolving issues across different areas of the project. This includes working on the frontend of the application , configuring REST APIs , and collaborating on various aspects.

Spain
Sep 2022 - Apr 2023

FullStack Developer,React+, Styled Components, Axios
Orienteed

I worked as a Java developer and was responsible for developing all components of the system. This included working on the backend with Oracle and Spring MVC/Spring Batch architecture to create REST services, and on the frontend using JSP, JQuery, JavaScript for the view.

Spain
Nov 2017 - Jul 2022

FullStack Developer TF7 (Java + JSP)
Viewnext

I worked as a Java developer and was responsible for developing all components of the system. This included
working on the backend with Oracle and Spring MVC/Spring Batch architecture to create REST services, and
on the frontend using JSP,JQuery, JavaScript for the view.

EDUCATION

Technological Bachelor
IES Pedro Floriani

Spain

Degree in computer engineering
University of Vigo

I completed my university education here, where the focus was on software development and algorithms. I gained
experience programming with Java, C++, React, MySQL, and PHP.

SKILLS

- Communication Skills
- Ability to Work Under Pressure
- Teamwork
- Adaptability
- Strong Leadership Skills
- React
- React Native
- Apollo
- Express
- GraphQL
- Java
- JavaScript
- NodeJS
